

## INSTALLATION INSTRUCTIONS

**WARNING**  
ELECTRICAL SHOCK HAZARD

**READ, UNDERSTAND, and FOLLOW** these instructions before installing the equipment.

### WARNING

**EN**

Disconnect the Electrical supply power at the service panel (fuse or circuit breaker box). Failure to do so could result in serious injury or death. Only qualified electricians should install this fixture and the installation **MUST** conform to the Electrical Code and all local codes and ordinances. Ensure that only proper tools, materials, and equipment are used to complete the installation.

Ensure that only proper tools, materials, and equipment are used to complete the installation before attempting the installation.

## SAFETY

When using electrical equipment, basic safety precautions should always be followed including the following:

- Do not let power cords touch hot surfaces.
- Do not mount near gas or electric heaters.
- Equipment should be mounted in locations and at heights where unauthorized personnel will not readily subject it to tampering.
- Do not use this equipment for anything other than its intended purpose.
- Servicing this equipment should be performed by qualified service personnel.
- Save these instructions for future reference

## INSTALLATION INSTRUCTIONS

### MODEL INFO

RD-L8 (Roof Top Mount)

### MOUNTING

1. Turn the intended power source off.
2. Mount the driver box arm and support arm to the roof top in the proper sequence. Use the appropriate hardware. Note that each driver box contains one driver per fixture.

1. Insert the RD-L8 into the first arm, ensure the fixture wire side is oriented towards the driver box arm, and not towards the support arm. Wire the fixture using the quick connects. Once the fixture is connected, test the fixture to ensure proper function. Troubleshoot connections as necessary. See image below for mounting details.
