FEATURES		
	BRIGHTNESS:	Sets the highest light fixture brightness when motion is detected.
	SENSITIVITY:	Sets the sensitivity to which the sensor will detect motion.
	HOLD TIME:	The time the light fixture will remain at the brightness setting after it detects motion.
	DAYLIGHT SENSOR:	The lux setting that the light fixture will turn on/off. If the ambient lux is more than the defined lux setting, the fixture & sensor function will turn off and remain off until the ambient lux is below the setting. To disable the lux sensor, select the SUN icon. To set the lux to match current room conditions, select the EYE icon.
	STAND-BY DIM:	The Dim level that the light fixture will dim down after the Hold Time has expired. To disable dimming and only have ON/OFF, select the 0% icon
	STAND-BY TIME:	The time the light fixture will remain in the dim down state before it shuts off. To disable the light from shutting off, select the INFINITY icon.
